

Alex Chen - Senior Python Developer

Email: alex.chen@example.com | Phone: +1 555-0192 | Location: San Francisco, CA
LinkedIn: linkedin.com/in/alexchen-dev | GitHub: github.com/alexchen

PROFESSIONAL SUMMARY

Senior Python & Backend Developer with over 6 years of experience building scalable web services, REST APIs, and machine learning backend integrations. Expert in Python, Django, Flask, PostgreSQL, and cloud deployments. Passionate about clean architecture, CI/CD, and distributed systems.

CORE COMPETENCIES & TECHNICAL SKILLS

Languages & Frameworks: Python, Django, Flask, FastAPI, REST APIs, GraphQL

Databases: PostgreSQL, MySQL, Redis, MongoDB, SQL query optimization

Tools & DevOps: Git, Docker, Kubernetes, AWS, Linux, CI/CD pipelines, Celery

Machine Learning & Data: Machine Learning, Scikit-learn, Pandas, Model Serving APIs

PROFESSIONAL EXPERIENCE

Senior Backend Engineer | CloudScale Systems | 2021 - Present

- Architected and deployed microservices handling 25M daily requests using Python and Django.
- Designed relational schema and optimized complex SQL queries on PostgreSQL, reducing latency by 42%.
- Integrated machine learning inference pipelines via REST APIs for real-time recommendation scoring.
- Mentored 5 junior engineers and established Git code review workflows and automated testing.

Software Developer | DataWave Solutions | 2018 - 2021

- Developed backend RESTful APIs with Python, Django, and Celery for asynchronous background jobs.
- Automated containerized application deployments with Docker and Git version control.
- Collaborated with data science teams to productionize machine learning classification algorithms.

EDUCATION

Bachelor of Engineering in Computer Science | California State University, 2018
